

Make your own plastic planters!

Supplies

- used plastic bottle
- scissors
- paint & paintbrushes
- potting soil & spoon/shovel
- plant

Making your own planters allows you to reuse plastic and removes the need to buy a new plastic product.

- 1. Wash out and dry the plastic bottle.**
- 2. Cut it in half and recycle the top part.**
- 3. Paint bottle with design of your choice and let it dry for at least 2 hours.**
- 4. Optional: You can make a hanging planter by punching a hole on each side and tying twine to it.**
- 5. Cut holes in the bottom for drainage.**
- 6. Add potting soil and repot plant.**
