

meet me!

MAMMALS

JULIO

Julio loves running so much that we got him a large wheel so that he can run to his heart's content.

THREE-BANDED ARMADILLO

This is the only armadillo species that can completely curl into a ball.

Conservation Status: Near Threatened

Range: South America

ANY EVENT | <60 MINUTES

MAKODA

Makoda loves digging, so we frequently hide her food under large piles of mulch and dirt.

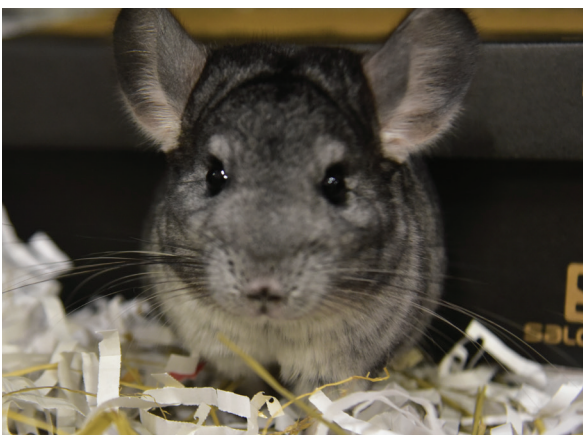

AMERICAN BADGER

American badgers have loose skin that enables them to turn around in tight spaces such as underground burrows.

Conservation Status: Least Concern

Range: Northwest USA

PRE-WEDDING, BIRTHDAYS | 15 minutes

SASSAFRAS & APPLESAUCE

Many people think they look exactly the same, but Sassafra's actually weighs a bit more, and Applesauce's eyes are closer together!

CHINCHILLA

Chinchillas keep their fur clean by rolling in volcanic ash.

Conservation Status: Endangered

Range: Andes mountain region

INSIDE ONLY | <30 MINUTES

JANET

Janet was rescued from a basement in upstate NY before being brought to the Zoo!

GENET

A genet's slender frame and impressive balance make them exceptionally well adapted for climbing.

Conservation Status: Least Concern

Range: Africa

PENGUIN COAST LEARNING LAB ONLY | 15 MINUTES

MOSI, MCHUMBA & GARY

Our tenrecs are all trained to target, kennel voluntarily, and get their nails trimmed.

LESSER HEDGEHOG TENREC

Lesser hedgehog tenrecs are one of over 30 different species of tenrec that can be found on the island of Madagascar.

Conservation Status: Least Concern

Range: Madagascar

ANY EVENT | <60 MINUTES

RICO

When a member of the embassy feeds Rico one of his favorite foods, he will pull their hand close while he eats.

PREHENSILE-TAILED PORCUPINE

Like many nocturnal animals, the prehensile-tailed porcupine has poor eyesight but keen senses of touch, hearing, and smell.

Conservation Status: Least Concern

Range: South America

ANY EVENT | <30 MINUTES

BART, BOOTS & EDWARD

Our rats are all named after famous pirates because they are pi-rats!

DOMESTIC RAT

Domestic rats are fastidious animals, spending large amounts of time grooming and making sure their fur is clean.

Conservation Status: Least Concern

Range: Domestic

INSIDE ONLY | <30 MINUTES

meet me!
BIRDS

AFRICAN PENGUINS

All of our penguins are trained to voluntarily go on the scale once a week!

This is a temperate species—they are adapted to a climate similar to what we have here in Baltimore.

Conservation Status: Endangered

Range: Africa

ANY EVENT | <30-60 MINUTES

ECHO

Echo likes to practice new sounds/words in private, so she will sometimes walk herself from where she hangs out during the day with her keepers to the enclosure she lives in at night so she can practice in peace.

AFRICAN GREY PARROT

This is the largest parrot species found in Africa.

Conservation Status: Endangered

Range: Africa

ANY EVENT | <60 MINUTES

LOUIE

One of Louie's favorite things to do is slide down a metal pole like a fireman.

GREEN WINGED MACAW

Green-winged macaw beaks have about 2000 PSI of pressure and can break a broomstick in half.

Conservation Status: Least Concern

Range: South America

ANY EVENT | <30 MINUTES

TYSON

Tyson loves when his keepers build him a blanket fort so he can hide and play inside.

MILITARY MACAW

The name of this species derives from its overall olive green coloration with a striking red patch above their beaks, which is reminiscent of military uniforms.

Conservation Status: Vulnerable

Range: South America

ANY EVENT | <30 MINUTES

ATHENA

Every year, Athena molts all of her head feathers at once, leaving her with a round fluffy body and a naked, goofy-looking head.

EASTERN SCREECH OWL

Screech owls have serrated flight feathers which allow them to fly silently.

Conservation Status: Least Concern

Range: Eastern USA

ANY EVENT | <30 MINUTES

KLAUS & CLARA

Klaus and Clara were hand raised by their keepers beginning when they were just days old and, because of that, they are very comfortable exploring all around the Zoo.

VON DER DECKEN'S HORNBILLS

When a female is ready to lay eggs, her mate will seal her into the nest cavity with mud and droppings and bring her all of her food for two months while she incubates the eggs and raises the chicks.

Conservation Status: Least Concern

Range: East Africa

PRE- WEDDING FLIGHTS | <15 MINUTES

HUEY

Huey is named after everyone's favorite Australian - Hugh Jackman!

SHERMAN

Sherman is named after P. Sherman, 42 Wallaby Way in *Finding Nemo*.

TAWNY FROGMOUTH

When threatened, tawny frogmouths will do a behavior called "stumping," which involves them tilting their head up, squinting their eyes, and flattening their feathers so they look like a broken tree branch.

Conservation Status: Least Concern

Range: Australia

INSIDE ELOPEMENTS ONLY | <30 MINUTES

PANAMANIAN GOLDEN FROGS

All of our PGFs are named after researchers in Panama who are studying PGFs and their habitat.

They are the national symbol of Panama, like the bald eagle is for the United States.

Conservation Status: Extinct in the Wild

Range: Panama

ANY EVENT | <60 MINUTES

meet me!

REPTILES

YANG

Yang is trained to walk in and out of her kennel voluntarily, and she is the only ambassador Chinese alligator in the United States!

CHINESE ALLIGATOR

There are only two species of alligator, the American and the Chinese.

Conservation Status: Critically Endangered

Range: China

NORTHERN PASSAGE HILL | <60 MINUTES

BLINK

Even though geckos eat bugs in the wild, Blink is picky and doesn't like eating crickets!

IRAQI EYELID GECKO

When threatened, these geckos are able to drop their tails to make an escape, and will eventually grow a new tail in its place!

Conservation Status: Unknown

Range: Middle East

ANY EVENT | <60 MINUTES

PACIFIC, FIG & SOLOMON

Pacific and Solomon were the first Embassy animals to have a baby - our third skink, Fig!

PREHENSILE-TAILED SKINK

The prehensile tailed skink is the largest skink species in the world.

Conservation Status: Near Threatened

Range: Solomon Islands

ANY EVENT | <30 MINUTES

WHIFFLE

Whiffle loves to hide, so we provide her with lots of different opportunities, including a miniature tent that she loves to hang out in!

BALL PYTHON

When threatened, ball pythons will often curl tightly into a ball with their heads in the center—that's how they got their name!

Conservation Status: Near Threatened

Range: Africa

ANY EVENT | <60 MINUTES

MUFFIN

Muffin loves to hide under the moss in his enclosure, but he always makes a point to stick his head out when his keepers are walking by to say hello!

CORN SNAKE

Corn snakes are one of the 27 species of snakes native to the state of Maryland.

Conservation Status: Least Concern

Range: USA

ANY EVENT | <60 MINUTES

NEBULA & GAMORA

Our Dumerils Boas love hiding in logs, so we provide them with lots of different opportunities to snuggle up!

DUMERILS BOA

Boas are ovoviviparous, meaning their young hatch from eggs inside the mother's body.

Conservation Status: Least Concern

Range: Madagascar

ANY EVENT | <60 MINUTES

ELVIS

Elvis makes it clear that she can identify her individual keepers, exhibiting different behaviors depending on who she is with.

CALIFORNIA KINGSSNAKE

Kingsnakes are able to prey on other snakes—including venomous species like rattlesnakes.

Conservation Status: Least Concern

Range: USA

ANY EVENT | <60 MINUTES

JOHN

John is trained to target, and is able to solve puzzle feeders to find his food!

EASTERN INDIGO SNAKE

Eastern indigo snakes are the longest snake species native to the United States.

Conservation Status: Threatened

Range: South East USA

ANY EVENT | <60 MINUTES

STATLER

You might typically think that turtles and tortoises choose to hide in their shells, but Statler loves napping all stretched out under his heat lamp.

EGYPTIAN TORTOISE

This is one of the most endangered species of tortoise in the world.

Conservation Status: Critically Endangered

Range: Libya

ANY EVENT | <60 MINUTES

JAKE & ELWOOD

Jake and Elwood love exploring throughout our Embassy building, letting us know when they want to come out by going to a specific spot in their enclosure and waiting patiently!

RED FOOT TORTOISE

When males want to attract females, they'll make a clucking noise that sounds like a chicken!

Conservation Status: Vulnerable

Range: South America

ANY EVENT | <60 MINUTES

JUNO

Juno was confiscated from a traveler bringing her illegally into BWI, and she only weighed 30g (about as much as a pencil!)

GREEK TORTOISE

This type of tortoise only grows to be about 6-8 inches long!

Conservation Status: Vulnerable

Range: Throughout the Mediterranean region

ANY EVENT | <60 MINUTES

CHOLULA, TAPATIO, & VALENTINA

Our tarantulas seem to enjoy hanging out upside down as much as they enjoy being right side up!

MEXICAN RED-KNEE TARANTULA

Female tarantulas can live over 30 years, while male tarantulas do not typically live past 10.

Conservation Status: Vulnerable

Range: Central Pacific coast of Mexico

ANY EVENT | <60 MINUTES

meet me! INVERTEBRATES

MADAGASCAR HISSING COCKROACHES

Our cockroaches are prolific breeders, producing 100s of offspring every year.

Hissing cockroaches get their name from the sound they produce when they push air through the holes along their abdomen.

Conservation Status: Least Concern

Range: Madagascar

ANY EVENT | <60 MINUTES
